PROFESSIONAL SUMMARY

Results-driven Computer Science student with strong passion for backend development, data engineering, and cybersecurity. Demonstrated ability to design scalable, secure systems and thrive in fast-paced startup environments. Seeking to leverage Python expertise, backend architecture knowledge, and security-first mindset to build production-grade AI products.

EDUCATION

B.E. – Computer Science and Engineering

Kalignar Karunanidhi Institute of Technology, Coimbatore, India

Expected Graduation: September 2028

TECHNICAL SKILLS

Languages	Python, C, C++, JavaScript
Backend & APIs	FastAPI, Flask, RESTful APIs, Microservices Architecture, API Integration
Databases	MySQL, PostgreSQL, MongoDB (queries & data modeling)
Data Engineering	ETL Pipelines, Data Transformation, Ingestion Workflows, Data Validation
Cloud	AWS Fundamentals, Linux System Administration, Debugging & Troubleshooting
Cybersecurity	Secure Coding, API Security, Data Protection, OWASP Standards, Vulnerability Assessment
Tools & Practices	Code Documentation, Code Reviews, Problem-Solving, Team Collaboration, Agile

LEADERSHIP

Student Lead – PALS, IIT Madras

Ongoing

- Mentoring peers and supporting their technical and academic growth.
- Organizing technical sessions and workshops to deepen domain knowledge.
- Facilitating collaborative learning environments for hands-on problem solving.

PROJECTS & EXPERIENCE

JARVIS – Personal AI Voice Agent

Personal Project

- Built a personal AI voice agent using Python and machine learning that understands natural language commands and performs tasks autonomously.
- Integrated speech recognition, NLP pipelines, and task-execution modules for a seamless voice-driven experience.
- Designed modular architecture to allow easy extensibility for new commands and integrations.

MilkAnalyzer – PALS INNOWAH 2026

Finalist

- Developed a machine learning model to analyze milk quality for the PALS INNOWAH 2026 innovation challenge.
- Engineered feature extraction from sensor and chemical data to classify milk quality with high accuracy.
- Achieved Finalist standing in the national-level INNOWAH 2026 competition organized under PALS, IIT Madras.

EYIC Food Saver – Zero Hunger Initiative

October 2024 – January 2025

- Architected backend system to address UN Sustainable Development Goal 2 (Zero Hunger).
- Designed scalable solution to reduce food waste and optimize food distribution to underprivileged communities.
- Implemented data pipelines for real-time food inventory tracking and distribution management.
- Integrated multiple data sources using RESTful APIs and microservice architecture.
- Applied secure coding practices to protect sensitive user and distribution data.

Phishing Email Detection System

National Level Hackathon – ITERX'2026

- Developed an intelligent phishing email detection system as part of a national-level hackathon competition.
- Designed and implemented a machine-learning-based pipeline to classify phishing vs. legitimate emails with high accuracy.
- Engineered feature extraction from email headers, content, and metadata to identify malicious patterns.
- Applied NLP techniques for analyzing email body text and detecting social engineering cues.
- Integrated secure API endpoints for real-time email threat analysis in backend systems.

Cybersecurity Research & Implementation Projects

Ongoing

- API Security Hardening: Studied and implemented secure API design patterns, authentication mechanisms (JWT, OAuth), and input validation.
- Secure Data Handling: Explored encryption techniques, secure password storage, and data protection strategies in backend applications.
- Vulnerability Assessment: Analyzed real-world applications for OWASP Top 10 vulnerabilities and developed mitigation strategies.
- Network Security Fundamentals: Studied concepts including network protocols, firewalls, and secure communication channels.

VIT Bangalore GLOW Hackathon

Participant, 2024

- Competed in high-pressure environment, demonstrating rapid prototyping and problem-solving capabilities.
- Built full-stack solution under time constraints with focus on scalability and code quality.
- Collaborated with diverse team to ideate, develop, and present innovative solution.

Personal Portfolio Website

Personal Project

- Designed and developed a personal portfolio website from scratch to showcase projects, skills, and achievements.
- Built with modern web technologies focusing on clean UI/UX, responsive design, and fast performance.
- Deployed live at: sanjay-portfolio-dodf.onrender.com

CERTIFICATIONS & ACHIEVEMENTS

- Student Lead – PALS, IIT Madras (Ongoing)
- PALS INNOWAH 2026 – Finalist (MilkAnalyzer)
- National Level Hackathon ITERX'2026 – Phishing Email Detection System
- VIT Bangalore GLOW Hackathon – Participant (2024)
- Personal Portfolio Website – Designed, built & deployed at sanjay-portfolio-dodf.onrender.com
- Active in competitive programming and technical problem-solving.
- Continuous learner in backend development and cybersecurity domains.

LANGUAGES

Tamil: Native	English: Fluent	Hindi: Basic Understanding
